## CYBER SECURITY TECHNICIAN

During your programme  
you will learn how to:

- Implement a range of cyber security controls including cryptography, network security and physical security
- Manage vulnerabilities including advanced network security, threat detection and analysis, ethical hacking and pen' testing
- Manage risks incorporating tools such as CIA, asset management, logging and response protocols, organisational procedures and disaster recovery
- Deal with incident management including threat response and vulnerability monitoring.

**T**his apprenticeship will equip you with the critical skills needed to excel in a wide range of cyber positions such as Threat and Risk Analyst, Access Control Administrator, Incident Response Technician and Cyber Security Administrator.

### LEVEL 3

Combines online learning, virtual or classroom training and on-the-job experience to develop real world skills using innovative technology.

### 14 MONTHS

Taught and supported by experts who've been there, done that & got the t-shirt, followed by mentoring through your end-point assessment.

### 5 CORE MODULES

Five easy to follow modules teaching theory and practical applications, tailored towards the individual needs of the candidate.

Call Bragd now on 01173 258 676 or visit [www.bragd.co.uk](http://www.bragd.co.uk) for more information.

## The Art of Apprenticeships

On successful completion of your apprenticeship, you will also gain the following qualifications:

- Level 4 Diploma in Network Security
- Level 4 Certificate in Cyber Security

You will have the option to apply for BCS membership and Professional RIT Tech registration.

## WHAT DOES 10:20:70 MEAN?

To give you the best possible apprenticeship experience, we use a 10:20:70 structure to plan your 'off-the-job' time as follows:

**10** 10% is made up of virtual or face-to-face workshops that provide an interactive 'kick start' to each topic

20% is made up of online study using our virtual learning platform as well as individual coaching and mentoring sessions and self directed learning

**70** 70% is made up of a range of 'knowledge-into-practice' work-based activities and projects, where we work with you to apply your new knowledge and skills in the real world.

This all prepares you for a smooth transition into your end point assessment. **What's not to like?**

## CYBER SECURITY TECHNICIAN

### AS PART OF YOUR PROGRAMME, WE WILL ALSO:

Develop you holistically as a person - building your confidence and giving you crucial career skills that will enable you to perform at your best - every time. These can include emotional intelligence, project management, effective communication and stakeholder engagement.

Our success rates talk for themselves but talk is cheap. It's the doing that counts and we can do.
