DEVOPS ENGINEER

During your programme
you will learn how to:

- Work effectively as part of a collaborative DevOps team (development and operations teams) to deploy end-to-end business solutions
- Work across all stages of the software development lifecycle, rapidly developing and deploying software to meet to changing user needs
- Use multiple tools and techniques to make sure that scripts are built and deployed effectively; use PowerShell and Python to automate common tasks and control manual, error-prone processes
- Apply leading security practices to ensure systems are safe and secure against cybersecurity threats

This apprenticeship will equip you with the critical DevOps skills needed to create, implement or improve infrastructure and software. DevOps are multi-skilled IT professionals working in wide range of positions such as Automation Engineer, Deployment Engineer, Full Stack Developer and DevOps Engineer.

LEVEL 4

Combines online learning, virtual or classroom training and on-the-job experience to develop real world skills using innovative technology.

14 MONTHS

Taught and supported by experts followed by mentoring through to end-point assessment, completed in the last few months of the programme.

8 CORE MODULES

Eight easy to follow modules teaching theory and practical applications, tailored towards the individual needs of the candidate.

Call Bragd now on 01173 258 676 or visit www.bragd.co.uk for more information.

The Art of Apprenticeships

On successful completion of your apprenticeship, you will also gain the following qualification:

- Level 4 Diploma in Network Systems and Architecture

You will have the option to apply for BCS membership and Professional RIT Tech registration.

WHAT DOES 10:20:70 MEAN?

To give you the best possible apprenticeship experience, we use a 10:20:70 structure to plan your 'off-the-job' time as follows:

10% is made up of virtual or face-to-face workshops that provide an interactive 'kick start' to each topic

20% is made up of online study using our virtual learning platform as well as individual coaching and mentoring sessions and self directed learning

70% is made up of a range of 'knowledge-into-practice' work-based activities and projects, where we work with you to apply your new knowledge and skills in the real world.

This all prepares you for a smooth transition into your end point assessment. **What's not to like?**

DEVOPS ENGINEER

AS PART OF YOUR PROGRAMME, WE WILL ALSO:

Develop you holistically as a person - building your confidence and giving you crucial career skills that will enable you to perform at your best - every time. These can include emotional intelligence, project management, effective communication and stakeholder engagement.

Our success rates talk for themselves but talk is cheap. It's the doing that counts and we can do.
